## **Seattle Semiconductor Startup, Mobile Semiconductor Corporation Closes Series A Financing Round**

Seattle, Washington-March 26, 2009- Mobile Semiconductor Corporation announces the successful completion of its Series A financing. The \$0.7 million round was led by Datalight, Inc. In connection with the funding round Roy Sherrill, founder and CEO of Datalight will join the board of Mobile Semiconductor Corporation.

Mobile Semiconductor's memory system architecture is designed for advanced mobile devices and embedded systems. The technology can improve a variety of mobile computing devices such as smartphones, game players, advanced MP3 players, or mobile video players.

### **About Mobile Semiconductor**

Mobile Semiconductor Corporation is a Washington Corporation, founded in 2006. Mobile Semiconductor is a design company supplying complete, differentiated, high-performance embedded memory systems based on solid state flash based technologies. Products include a Memory Controller for advanced mobile devices, an NVMHCI based PCI-Express Solid State Drive, and Specialized Embedded Memories for ASIC design.
